THE NEW TESLA ADD ON

Simply pick your model to purchase and we can fit this dashboard trim front to replace the standard dashboard and console. This is an upgrade and we think you will like it.

The journey is the destination

INNOVATIVE INTERFACES FOR YOU

Innovative steering

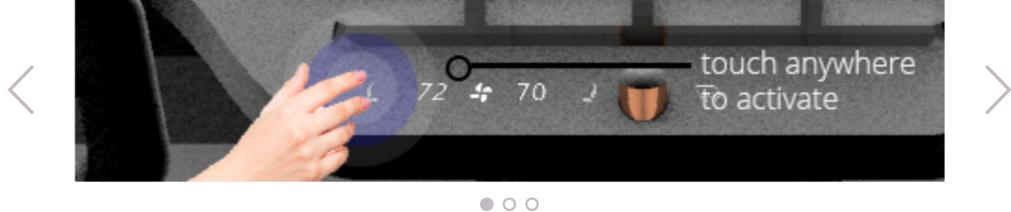

New technology allows us to change the form for you. We added an horizontal form for more of a view of the steering wheel, ergonomic side grips, and touch sensors.

• • • •

Modular dashboard controls

The dashboard features buttons that can be moved and located to where you can easily press without much effort.

See content you only need

Micro-LED transparent and opaque monitors allow us to show what you want while close to the road. After use, the monitor looks like it disappears as being a glass screen.

Safety just became easier

The new Tesla driving console now features level 3 driving where the machine does most of the work for you. This is a step up from the current fleet automation of level 2. You the driver only need to over take when needed in a few circumstances.
